

Caplugs has been a leader in plastic molding since 1948.

Headquartered in Buffalo, New York, Caplugs has four facilities in the United States and two facilities in China with five molding processes:

1. Injection Molding
2. Vinyl Dip Molding
3. Extrusion
4. Rubber Molding
5. Die Cutting

Caplugs European expansion will build on what LoVen has started. The goal is to grow the company into a comprehensive plastic molding partner that offers catalog products, custom design, and multiple molding capabilities.

Caplugs & Loven  
Have Joined Forces

Two Industry Leaders

Joining Teams To Expand  
Our Capabilities

A Global Partner Our  
Customers Can Trust

LoVen has been a trusted supplier of vinyl protection and coatings for over 20 years.

Like Caplugs, LoVen has built an extensive product line for quick and easy ordering, as well as maintained comprehensive custom design capabilities to meet their customers more complex needs.

As a customer of LoVen, you can expect the same great quality and service you have today, with improved access to the full range of products offered by Caplugs.

Caplugs knows the LoVen team are experts and their molding processes are best-in-class. Caplugs intends to expand these capabilities and continue supporting all the attributes that have made LoVen successful.

## What To Expect Next

1. Business as usual – our goal is to make this acquisition and integration as seamless to customers as possible.
2. LoVen has a great team that we want to keep in place, ensuring you will continue to receive the best service in the industry without disruption.
3. We will start using the Caplugs name with the LoVen name to help the market become familiar with the Caplugs brand.
4. As we progress through the integration, we may make some logistical changes such as remit to address, but for now, everything remains the same.
